Artificial intelligence
(auto framing)

A practical and organized solution featuring 6 highly sensitive **built-in microphones** and a **120° wide-angle** lens that covers every corner of the room.

The **4K resolution** delivers vivid details and vibrant colors, while the artificial intelligence enables **automatic framing**. It also features **built-in speaker** units.

Key Features

4K Resolution and Wide Field of View

The Meeting delivers high-quality video with resolutions up to 4K. Its wide-angle lens covers an area of 120°, ensuring visual coverage of all participants, including those closest to the camera.

Flexible USB Connectivity

To use the Meeting, simply connect it to your computer using the USB cable – no need to install drivers or additional software. It is fully compatible with the market's leading videoconferencing applications.

Audio Capture and Speakers

Equipped with six MEMS microphones for precise audio capture up to 19.6 feet (6 meters) and two 10W speakers for an exceptional audio experience.

Artificial Intelligence

Speaker Tracking that automatically highlights the active speaker and auto framing, that frames all meeting participants without requiring manual adjustments.

Adaptable to Your Environment

The universal base allows for use on tables, TV mounts, or wall installation, eliminating the need for extra accessories.

Expand the Audio Capture

Enhance audio pickup with two expansion microphones with premium fabric finish. Each microphone captures up to 9.8 feet (3 meters) and includes a mute button.
